The WORLD'S BEST LEMON SQUEEZER

Is to the old-fashioned article what the Railway is to the Stage Coach. bitter from the rind, as it acts on the pulp only. Made of glass it is kept clean as easily as a tumbler. Almost instantaneous in action, a child can use it without soiling the hands.

TO USE THE MODERN LEMON JUICE EXTRACTOR-Set it apon a tumbler as shown in sketch, cut the lemon in half, place the half lemon upon the points and press downwards, slightly twisting it. The ribs easily enter the pulp, and the juice pours down through the openings into the tambler.

The openings are so small that the pips cannot pass.

Once tried it will supersede all old-fashioned appliances. Over a million sold already. Patented in all leading countries. It is to be had at most large Stores. Should you be unable to obtain one, the Proprietor will send one post free to any

part of China on receipt of 2s., or 6 for 10/4. B. & E. WCHUGH, Rosemary Street, Belfast, IRELAND.

HEALTH FOR ALL!!!

DR. J. COLLIS BROWNE'S CHLORODYNE

(Ex Army Med. Staff) IS THE ORIGINAL AND ONLY GENUINE. CAUTION.-Vice-Chancellor Sir W. P. Wood stated that Dr. Collis Browne was undoubtedly the inventor of Chlorodyne; that the story of the defendant Freeman being the inventor was deliberately untrue, which he regretted had been aworn to.

Kminent Hospital Physicians of London stated that Dr. J. Collis Browne was the
discoverer of Chlorodyne; that they prescribe it largely, and mean no other than

Dr. Browne's. - See Times, July 12, 1864. The public, therefore, are cautioned against using any other than

DR. J. COLLIS BROWNE'S CHLORODYNE. REMEDIAL USES AND ACTION. This invaluable remedy produces quiet, refreshing aleep, relieves pain, calms the system, restores the deranged functions, and stimulates healthy action of the secresions of the body, without creating any of those unpleasant results attending the use of opium. Old and young may take it at all hours and times when requisite. Thou-sands of persons testify to its marvellous good effects and wonderful cures, while

medical men extol its virtues most extensively. CHLORODYNE is admitted by the profession to be the most wonderful and valuable CHLORODYNE is the best remedy known for Coughs, Consumption, Bronchitis, Asthma.
CHLORODYNE effectually checks and arrests those too often fatal diseases—

Diphtheria, Fever, Croup, Ague.
CHLORODYNE acts like a charm in Diarrhoea, and is the only specific in Cholera

CHIORODYNE effectually cuts short all attacks of Epilepsy, Hysteria, Palpitation

CHIORODYNE is the only pulliative in Neuralgia, Rheumatism, Gout, Cancer, Toothacke, Meningitis, &c.

From Symes & Co., Pharmacoutical Chemists, Medical Hall, Simla, January 5, 1880. To J. T. Davenport, Esq., 33, Great Russell Street, Bloomsbury, London. Dear Sir, we embrace this opportunity of congratulating you upon the wide-spread reputation this justly-esteemed medicine, Dr. Collis Browne's Chlorodyne, has earned for itself, not only in Hindestan, but all over the East. As a remedy of general utility: we much question whether a better is imported into the country, and we shall be glad to hear of its finding a place in every Anglo-Indian home. The other brands, we are happy to say, are now relegated to the native baznars, and, judging from their sale, we fancy their sojourn there will be but evanescent. We could mistiply instances ad infinitum of the extraordinary efficacy of Dr. Collis Browne's Chlorodyne in Diarrhosa and Dysentery, Spasms, Cramps, Neuralgia, the Voiciting of Pregnancy, and as a general sedative, that have occurred under our personal observation during many years. In Choleraic Diarrhosa, and even in the more terrible forms of Cholera itself, we have witnessed its surprisingly controlling power. We have never used any other form of this medicine than Collis Browne's, from a firm conviction that it is decidedly the best, and also from a sense of duty we owe to the profession and the public, as we are of opinion that the substitution of any other than Collis. Browne's is a deliberate breach of faith on the part of the chemist to prescriber and patient alike. We are, sir, faithfully yours, Symes & Co., Members of the Pharm. Society of Great Britain, His Excellency the Viceroy's Chemista. Extract from the General Board of Health, London, as to its efficacy in Cholera :

Bo strongly are we convinced of the immense value of this remedy that we cannot too forcibly urge the necessity of adopting it in all cases. CAUTION .- None genuine without the words . Dr. J. Collis Browne on the

All the local insurance offices are cer of the French Government, has to any pretty heavily interested. on the subject. In a report furnished by him to the Blinister of the Interior and published in the Journal Officiel, Mr Proust That what may be termed the commercial says :- 'At the beginning the epidemic was remarkable for its short duration and slight gravity. In many public institutions such as schools and colleges there were hundreds of cases without a single death or a single acrious attack. But very scon to the first nervous and gastric forms, there were added laryngeal, bronchital and pulmonary symptoms. These complications, the pulmonary congestions, the chest inflammations and the pneumonia have been observed chiefly in persons who,-efter haying been attacked, continued their occupations or took them up again too soon, or who, while a suffering exposed themselves to cold, and also in individuals enfeebled by age or sickness. This is, moreover, what happened in the most of former epidemics. In the epidemic of 1733 the malady was not dangerous, but there died a large number of old people, indigent sufferers from phthisis. and other persons enfeebled by maladies. In the spidemic of 1743 the malady, although wide spread, was not dangerous with proper care it disappeared in the third or fourth day, the treatment being more a question of regime than of medication. The fatal cases were confined to old people, those enfeebled by serious illness, those susceptible to pneumonia or children affected by some pulmonary disease. The epidemic of 1762 presented the same There is not therefore a very anpreciable difference between what is happening now and what occurred on former occasions. But within the last few days there has been noted in the present epidemic certain infectious forms of exceptional gravity. Although the mortality has increased in Paris and other towns to which influenza has apread, cannot be said that the present epidemic is very grave. The mortality caused by it or rather by the complications that ensue is amall compared to the number of people attacked. There has scarcely been one death in a thousand. The mortality would diminish, if persons after being attacked did not expose themselves to cold, were immediately treated and if care were taken in convalencence. If proper precautions in these directions were taken the epidemic ought not to be more serious than it was on former occasions or than it was at the beginning of the present outbreak."

PROSPERTY IN MEXICO. - Mexico is at the present time in a very prosperous condi The crops have almost without exception turned out well. The mines in the Republic are giving excellent returns; some people are making fortunes out of the railways, others from concessions and grants sined from the Government. Manufacturers are also doing an increased and lucrative business, and taken altogother, Mexico is in a flourishing condition.

THE PAST YEAR, 1889, -The past year must, on the whole, be looked upon as a favourable one in a financial sense. The number of new enterprises, both good and bad slike, that have been brought before the public exceeds that of 1888, and there still seems to be plenty of capital remaining to be invested. The past year has seen the disappearance of the old Three per Cent. Consols from the Stock Exchange list, and the reduction of } per cent, in the rate of Consol interest has caused a great amount of capital to be placed in the funds of home railway companies. The latter have had a very successful year, and the debenture stocks of most of the leading companies are now quoted at a higher price than at the same period last year. Colonial securities are also higher in price. In Foreign Stucks prices have dropped a little during the past year, Brazilian, of course, suffering from the severest depression. The past year has also witnessed the launching, in nearly all cases most successfully, of many trust companies, which give a good opportunity for investment with a fairly high rate of interest. Mining shares, especially South Africans, have been exceedingly fluctuating. Many industrial securities have rison substantially in price, and, soundness being so assured, investors have turned their eyes to this department, not so much for speculation as for permanent investment .-- The outlook for the year just opening is very bright. Trade is in a very flourishing condition, despite the disadvantages of petty strikes. To single out one branch of trade. shipbuilders have never had their hands so full as at present. The return of all of our home railway companies show week by week a good increase, and at the outset 1890 bids fair to be a successful year of trade.

some years been used with most satis factory results for fug signalling on the That the Queen's Counsel gave an admirable Swedish coast. Their signals have been heard as far as twelve nautical miles, which we believe is a greater distance than the signal from a siren can be heard. A new gun has just been manufactured and stationed at Holmo Gadd, in Sweden. Commander Engström baving furnished the drawings for this as well as the provious guns. The one in question is made of best wrought Sandviken Bessemer steel at the Stafsjo Engineering Company. It is 10 feet long, and the calibre is 60 millimetres. The breechloading mechanism is of Commander Engström's design, and allows of firing from twenty to thirty shots per minute. It will thus be possible to fire letters according to the Morse alphabet, one shot being a dot, and two shots close together a dash. Of this system of signalling more may be heard by and by. The breechloading mechanism can be taken out and to pieces in less than a minute, and without the use of any tools, and also put together without any, The cartridges can be used from 100 to 300 times, The gun rests on a gun carriage of wood and is placed in a small wooden shed, the barrel projecting through a hole in the wall, The shed or house is very conveniently arranged for the men, with accommodation for refilling the cartridges, &c. The gun, with That the Epidemic Hospital is to be on the 130 brass cartridges, spare ports, and ammunition for 10,000 shots, has only cost That the Hospital ship is to be built by the £275. The guo can probably stand some 40,000 shot, so the cost for a shot, exclusive of the power, will be only about 2d. - Knowneering.

That the withdrawal of that resignation meant that Mr Chater's influence on the Board was necessary to the very existenco of the Company, and that his brother directo's had no sympathy with the remarks made at the last shareholders

That it is generally conceded the Vice-Chairman and pillar of the Land Investment Company had no other alternative possible than that of a withdrawal of his resignation, whateverelse might have been done subsequently to obtain the opinion of the shareholders.

holding the relations that he has done and does with the Land Company, owes a duty to the general body of shareholders, as well as to himself, which far outweighs any considerations of private feeling.

That mere resignation, while it was a kind of concession to certain objectors, would have looked very like an evasion of manifest duty, and therefore Mr Chater is to be congratulated upon its withdrawal. Hongkong, 5th February, 1890. Singapore, 15th January, 1890.

Messrs Gibb, Livingston & Co., Hongkong. Dear Sirs,-During last year on the Songei Koyah Estate we planted off two thirds of 164 fields*; making good roads and drains for the same, four bongsals, coolie lines, hospital, and two assistant's houses Owing to the amount of sickness and the inferiority of the coolies, the fields could not be planted off to the back; but besides that we were far too late in planting, as the climate is just the same as Deli, and not three months later, as people in Borneo crop is very much lighter than it should be. off in time. Owing to the exceedingly high Fourth Sunday, at Evening Service. fluods, which I am told by the natives only take place once in 8 or 10 years, we lost 64

Our tobacco is a very fine quality, quite equal to that of Deli, and samples from On London-Koyah that were sent home have been valued at from 2/6 to 3/0 per lb., which with

an ordinary crop would give us a handsome This tobacco should be ready for ship-

ment in April. This year we have good prospects, for ! am sure we shall get 8 piculs a field, because the land is quite up to that in my opinion. and all the coolies were to go into their fields on the 3rd of this month. We have old hands and of good caste; and my head Dell. With 8 piculs a field, and anything like the price our samples have been valued at we shall have a nice profit from this

year's working. Our only danger is flooding, but that can be guarded against by a little banking and earlier planting excepting in the case of a flood like that of last year, which is said only to come once in 8 or 10 years, and never likely to take place when we have tobacco in the field, which will always be three months earlier than last year. I am, Dear Sire.

Yours faithfully, (Sgd.) J. S. KENNEDY. This statement may be misleading; the true mean. ing of it being that of the 10s fields, only two thirds of each field was placed under cultivation, (Note b) the General Managers.)

GAMBLING.

(Saturday Review.) The recent raids on the baccarat clubs in London, and the aubstantial fines inflicted upon their proprietors, have had the effect of stamping out, for a time at any rate. these undesirable institutions. But their history is not uninteresting in its way. The mode of foundation of the baccarat club in London was simplicity itself. of doubtful reputation, and two or three ex-military officers used to most together and constitute themselves into a committee. The next step was to take a house, and the next to elect members. The election to the club in question was apparently bonu fide. An entrance fee was paid, and a year's subscription was paid-a lew pounds are nothing to a professional gambler. But the club was a mere pretence. If you joined it believing it to be a bona file club, and went there for dinner, you would probably have found that there was no soup, no fish, and no vegetables to speak of You could have had a multon chop, or steak, or a Welsh rabbit ; liquors of course f and that is about all. The people who went to it went to play and for no other purpose. And, whatever particular device may have been adopted, the percentage on the gambling of the evening went steadily 'I'd rather be a wild turkey and live on into the proprietors; and amined all the bills found, and they the prairie, said a little boy, then be a this percentage often used to amount to as and hundredths. much as a hondred pounds a night. wherever possible, of keeping the bank themselves, or clso they arranged that it should be kept by a friend of theirs. During certain of the recent prosecutions it was clearly proved in evidence that a banker at baccarat has certain distinct advantages, of which he can avail himself if he is so disposed, and can so cover his fee for taking the bank and make a bandsome profit into the bargain. The clubs in question were

Of two evils, it is samples sent home in November last: better to choose the lesser. A public place the valuation wired from London being which is only open at stated hours during the day, where you can only lose the money It has been now shown on first opening which you happen to have upon you; is infinitely preferable to private gambling, useless for some time: The immediate to the demands of the enormous crowds who tables (the two trente-et qua ante and the six roulette tables being found insufficient to accommodate the players). At Monte Carlo, at any rate, you can only abuse the Administration if you lose, and you get no abuse in return. The doors are still open to you the next day, the same smiling servants take your hat and coat, and the most urbane of crouplers invites you play the game. Moreover, there are always wonderful stories of gigantic sums won by people who were at their last gasp, and, indeed, some of them are absolutely true. Last year, it is an authentic fact that an Italian who had just been made bankeupt in his own country, arrived earlier in the year, this should not occur at Monaco with thirty francs (in English money about twenty-four shillings). With this slender capital he managed to win £2,400, and when his luck turned and £400 of his winnings disappeared, he left off playing and returned to Italy to set up in business sgain with his capital of £2,000. Of course these cases are very rare, but novertheless they do occur sometimes, and many people who hear about them are shows the sum of \$96,449.68. Out of this thereby induced to play. The bank has a stuady advantage in its favour. The percentago is small, but it is certain, and, of course, the longer you play the more poeitive is it that you will love. Still if people will gamble, and, as the Bishop of Peterborough has pointed out, it is syident that In accordance with the Articles of As- there are those who cannot live without method of indulging in their favourite pastima is to go to Monte Carlo, and at any rate get a fair ran for their money. They will probably lose, but anyhow they will not be cheated.
